Personal Profile

I have a degree in Computer Engineering (Second Class Upper Division) from the University of Ghana. I like to take on new challenges related to Software Engineering and help others develop their programming skills. I love the Python Programming Language because of its enormous power and syntax simplicity. I would love to work in an environment where I would get the chance to solve critical real-world problems. I will like to master in Natural Language Processing and make significant contributions to the field in the future.

Education

Bachelor of Science in Computer Engineering - 2018
West African Senior Secondary Certificate Examination (WASSCE) – 2014

Work Experience

Intern (June, 2017 –July, 2017)
Finance Application Systems Limited (No. 10 NME Street, Airport Residential Area)
Software Engineer

Teaching Assistant (September, 2018 –September, 2019)
University of Ghana Computer Engineering Department.

Projects and Experiences

- Built a retailer searching platform to enable Wholesalers find people to retail their goods for them in exchange for a percentage of profits made.
- Developed a face detection web API to detect faces of humans in images if any to be integrated into a software to detect fake passport pictures during customer registration of Banking Institutions.
- Built a Celebrity face recognition system using Google's Tensorflow.

- Participant of Kaggle Data Science Competitions

Skills

▶ Python Programming Language (Proficient), Java (Prior Experience), Machine Learning.

Hobbies

- Playing and watching soccer.
